Autumn 1910.

Barr's "Gold Medal" Daffodils

AWARDED

Twenty-seven Gold Medals and a Ten Guinea Challenge Cup,

Also many First-class Certificates and other high awards.

NEW CLASSIFICATION OF THE DAFFODIL.

For some years past a general want has been felt by Daffodil exhibitors for a wider classification of the Daffodil than the existing one, which has not been found sufficiently elastic to take in several new forms of the Narcissus family raised by hybridists since the great Daffodil Conference of 1884. The Narcissus Committee of the Royal Horticultural Society was approached on the subject, and to meet the case appointed in 1909 a sub-committee to carefully go into the matter, and see how far the existing classification could be modified or altered so as to facilitate the placing of the many new seedlings now being raised. A good deal of time and careful study was given by the members of the sub-committee to the subject, and the revised classification which they brought forward was almost unanimously accepted by the full Narcissus Committee of the Royal Horticultural Society. In the following pages we have adopted to a great extent this classification, which we hope will be of valuable assistance to exhibitors of Daffodils and to amateurs who desire to make a selection of distinct types. As will be seen, 10 distinct divisions have been made together with a section at the end to take in a few unclassed species and hybrids. With each division we have given the distinguishing character.

BARR & SONS,

11, 12 & 13 King Street, Covent Garden, London

Culture and Adaptation of the Daffodil Outdoors.

Soil and its Treatment.—The Daffodil will thrive in any ordinary garden soil, but prefers a deep, rather moist loam. When the soil is of a dry and sandy nature, it should be deeply dug, if possible at least a season before planting the bulbs, well-decayed cow manure being added, and a potato or other vegetable or annual crop grown on the ground. Before the bulbs are planted a sprinkling of quick-lime should be spread on the surface and then dug in. If it is not convenient to first take off a crop of Vegetables or Annuals, then, in digging, mix with the soil crushed bones at the rate of 1½ oz. to the square yard. The ammoniacal properties of stable manure are injurious to the Daffodil; considerable risk is therefore incurred by using it. On good retentive loamy soils stable manure is not required and should not be used, but a dressing of lime once in every three years, with an annual dressing of Basic Slag, at the rate of 7½ oz. to the square yard, may prove beneficial.

Freshly dug Soil should be allowed to stand vacant two to three weeks before planting, to allow the ground to settle down, otherwise the freshly planted bulbs are sometimes drawn under considerably below their proper depth, and the bloom in consequence is apt to be weakened and retarded the first season.

The Best and Safest Manure to use is Crushed Bones or Basic Slag (*for price see page* 38). This should be applied at planting time, and may be mixed with the soil; the Crushed Bones may be applied at the rate of 4 cwt. to the acre, or 1½ oz. to the square yard, and Basic Slag may be applied in same manner at the rate of 1 ton to the acre, or 7½ oz. to the square yard. We recommend for light soils Crushed Bones (provided they are genuine) in preference to Basic Slag. On very poor and dry sandy soils we recommend in addition Sulphate of Potash (*for price see page* 38), to be sprinkled annually in the autumn over the surface of the ground, after planting, at the rate of 2 cwt. to the acre, or about ¾ oz. to the square yard. The potash not only increases the depth of colour in the flowers, but also helps to hold moisture in the soil, a condition so essential to the perfect development of the Daffodil. We also recommend the use of Phytobroma in autumn and spring (*see particulars, page* 38).

In Early Spring, as soon as the Daffodils begin to show above ground, the surface soil should be well broken with a hoe, to sweeten it after the heavy winter rains; a handy tool for this purpose will be found offered on page 37. Where practicable it is advisable to cover the ground in November with some light covering material (the idea is to prevent the autumn rains from beating down the crust of the ground, and to break the severity of a sudden frost). We use for this purpose pulled heather; cut furze or gorse, however, answers the same purpose; cut fern or bracken is bad, as it lies too wet; old pea sticks laid across the ground are good, or on flower beds sprays or small branches of cut evergreens stuck into the ground answer the purpose and look decorative; these of course need renewing when they get shabby. Do not mulch the beds with manure.

Planting and Lifting.—The best time to plant, to obtain the finest flowers, is early Autumn (as early as possible), *although bulbs may be put in as late as Christmas with fairly satisfactory results;* we have planted some Daffodils as late as the second week in February, and had some very good blooms the third week in May. We recommend, however, *early* planting for best results. The bulbs may be left undisturbed for years in ordinary good loamy soils, but on poor and light soils they are better lifted every two years, as soon as the foliage has died down, and replanted if possible immediately or as early as is convenient. Never plant when the ground is wet and sticky. Do not put silver sand around the bulbs of Narcissi except in the case of N. corbularia.

Depth to Plant.—The average depth to plant is from 2 to 3 inches, that is to say, a covering of 2 to 3 inches of soil, but not more. As the bulbs vary considerably in size, according to the relative varieties, the best rule to go by is the bulb itself, which should be *covered with soil once and a half its own depth*, measuring the bulb from the collar of its neck to its actual base. On light sandy soils the bulbs may be planted a trifle deeper than on heavy stiff soils, and in the North of England and in cold localities they should be put in a little deeper than in the warmer southern districts.

Position and Grouping for Effect.—All Daffodils prefer partial shade, although most of them will grow equally well in the open. The varieties which are best grown in partial shade are indicated in the following pages by an *. In the flower border, to obtain the best effect, Daffodils should be planted in large groups of irregular outline, each group or clump to contain one variety only; avoid straight lines, circles, and symmetrical designs. Masses of Daffodils should always appear in the Hardy Flower border, where irregular and effective sweeps can be planted between the clumps of herbaceous plants which in their turn grow up and hide as well as shelter the Daffodil foliage while it is going to rest. In grouping Daffodils the season of flowering should be borne in mind, as the varieties bloom in succession from the end of February to the end of May, during which period, by a judicious selection, a constant succession of flowers can be maintained. *On page* 15 *we denote the rotation of blooming.*

Naturalising Daffodils in Grass, Etc.—All Daffodils may be planted in grass with perfect success. To produce the best effect, the three groups should be kept separate: thus the Star Narcissi should not be mixed with the Great Trumpets, nor Poet's Narcissi with the Star Narcissi. In planting, make the breaks large and bold, scattering the bulbs over the ground broadcast with the hand, and planting them where they fall. Avoid symmetrical lines or formal circles as far as possible, as these are not found in nature. In planting under trees, avoid places where the drip from the branches is greatest, also where the main roots of the trees come close to the surface.

Daffodils never look more beautiful or are seen to greater advantage than when growing on grassy slopes or banks, and we strongly recommend our customers to avail themselves of such situations for naturalising Daffodils.

Varieties specially Suitable for Naturalising in Woodlands, Grasslands, Glades, Etc., Delighting in Partial Shade.—The following are mostly free seeders, and will therefore spread naturally; they are mostly wild plants—Abscissus, Countess of Annesley, Excelsior, Golden Spur, Henry Irving, Obvallaris, Spurius, English Lent Lily, Princeps, Scoticus, Albicans, Pallidus Præcox, Moschatus of Haworth

Naturalising Daffodils in Grass, Etc.—*continued.*

(very pretty in grass), Johnstoni Queen of Spain (in our opinion the most beautiful of all for this purpose), and all varieties of Poëticus, including the old Double White. THE VARIETIES UNDERLINED we do not recommend for the cultivated border, as they deteriorate the second year, while in woodlands, grass, or meadowland they flourish.

Varieties for Naturalising in Grasslands, Parks, Meadows, on Lawns, etc.—The following fine trumpet varieties are all good strong growers, as well as being distinct and effective—EMPEROR, EMPRESS, P. R. BARR, GOLDEN SPUR, QUEEN OF SPAIN, W. P. MILNER, HORSFIELDII, MADAME PLEMP, MRS. THOMPSON; of the chalice-cupped varieties the following are best suited to the purpose —INCOMPARABILIS, BEAUTY, FRANK MILES, STELLA SUPERBA, SIR WATKIN; LEEDSII M. M. DE GRAAFF, DUCHESS OF BRABANT, MINNIE HUME, and MRS. LANGTRY; BARRII CONSPICUUS, FLORA WILSON, CROWN PRINCE, ELLEN BARR, FALSTAFF, JOHN BAIN, ODORUS and O. RUGULOSUS; of the Poets' Narcissi for planting in grass we recommend POETICUS ORNATUS, ALMIRA, GRANDIFLORUS, HERRICK, and POETARUM and the late Pheasant's Eye (POETICUS RECURVUS); of the double-flowered daffodils, the Old Double Yellow (TELAMONIUS PLENUS), BUTTER AND EGGS, EGGS AND BACON, and CODLINS AND CREAM may be used.

For Lawns and Tennis Courts which have to be mown early we recommend the dainty Minimus, Cyclamineus, Minor, Nanus, and Lobularis. Being very early varieties the grass may be safely mown in May.

Varieties for Planting by the Water Side.—Daffodils produce a charming effect when growing at the water's edge. The following varieties we can strongly recommend for this purpose—*Odorus* and *Odorus rugulosus*, with their rush-like foliage and graceful golden flowers; *Duchess of Westminster*, *John Bain*, and the *old late Pheasant's Eye Narcissus* (*Poëticus recurvus*), with their graceful starry flowers; *Emperor*, *P. R. Barr*, and *Empress*, three noble trumpeters; *Sir Watkin*, *Barrii conspicuus*, *Stella superba*, *Beauty*, *Frank Miles*, and the *Double White Poeticus* or *Gardenia-flowered Narcissus*, *etc.* In choice spots near the water's edge the charming little *Cyclamineus* should be planted, as also the sulphur-coloured Hoop Petticoat Narcissus (*N. Bulbocodium citrinum*), both of which luxuriate in moist grassland.

Method of Planting Daffodils in Grass.—We recommend for this work our SPECIAL BULB PLANTER (*see illustration, page* 37). By the use of this implement the trouble of planting bulbs in grass is reduced to a minimum. It takes out a clean, circular piece of turf 2 to 2½ inches in diameter, and of sufficient depth. On making the second hole this piece of turf is released from the planter and lies ready on the ground to cover the bulb with. The soil is not in any way tightly pressed and made hard, which is the case when an ordinary dibber is used, and the appearance of the grass is not spoilt; in fact, after planting 10,000 bulbs with this tool on a greensward, one could hardly detect that the grass had been touched. If the ground is very poor and thin, a compost of fresh soil with an abundance of *Crushed Bones* (7 lbs. to a bushel) should be made and dropped into each hole before placing in the bulb, a little more should be given as a covering, and then the sod of turf be replaced and pressed down. The bulbs will then be given a fair start in their new quarters. (*For price of Barr's Special Bulb Planter, see page* 37.)

The Best Time for Planting in Grass *is with the advent of the autumn rains*, when the ground is in a fairly moist condition, it being impossible to plant whilst the ground is hard and solid from the summer heat; moreover, nothing is gained by planting in hot dry ground, to say nothing of the cost and labour of planting.

Cutting Daffodils for Decoration.

To obtain very fine blooms Daffodils should be cut in a young state, just when the bud is bursting, placed in water and allowed to expand in a greenhouse or sitting-room. The blooms opened in this way are larger and finer in texture and purer in colour than those which develop out of doors.

Culture of Daffodils in Pots or Boxes.

TIME OF POTTING.—Pot as early in autumn as possible to obtain the finest results and earliest blooms.

THE BEST COMPOST to pot Daffodils in is a mixture of two-thirds good fibrous loam (which should be pulled to pieces by the hand *and not passed through a sieve*, so as to retain in the soil as much old root fibre as possible), and one-third old decayed leaf soil, with a sprinkling of sharp silver sand, adding 1½ lbs. of bone meal or 1 lb. Phytobroma (*see page* 38) to every bushel of soil, which mix well together before using. In all cases the soil used should be fresh and sweet; *never pot in soil that is wet or sticky*. Barr's Fertilised Fibre, Shell and Charcoal may also be used; it is light and cleanly to handle, and is a suitable medium for growing all kinds of spring-flowering bulbs in pots or vases, either for indoor decoration or for cutting. (*See page* 38.)

THE POTS should be carefully washed or wiped clean before using. *Never pot in dirty or wet pots.*

GOOD DRAINAGE should be secured by placing three or more pieces of broken crocks over the hole, placing the crocks with bevelled sides uppermost, then cover crocks with a little rough fibre from the loam. When boxes are used, the slit at bottom of box should be covered with crocks, a good layer of rough fibrous loam placed at bottom of box, or a layer of leaf soil to ensure perfect drainage.

IN POTTING, the larger bulbs need not be quite covered with soil, the level of which should be half an inch below the rim of the pot so as to allow of watering when in growth. The small bulbs of the miniature species should be covered with half an inch of soil.

AFTER POTTING, stand the pots or boxes outside in the open, on a firm bottom such as a bed of ashes or gravel path to prevent the entrance of worms. The pots should be plunged bodily in Cocoa Fibre, old decayed leaf soil, or very old ashes, free from sulphur, so as to be surrounded with the covering material and with their tops 2 inches below the surface. This will secure a natural and moist condition to the bulbs and encourage root action. So long as the pots remain buried they will require no watering.

Culture of Daffodils in Pots or Boxes—*continued.*

THE POTS OR BOXES SHOULD REMAIN PLUNGED for a period of not less than twelve weeks, after which first-early sorts (marked 1 in catalogue), such as GOLDEN SPUR, HENRY IRVING, OBVALLARIS, etc., may be transferred to a greenhouse or sitting-room where the night temperature does not exceed 55° and that of the day 60°. A higher temperature should not be given if well developed blooms are wished for. If the pots are taken into a sitting-room they should be kept during the day in a sunny window and at all times should be protected from draughts and gas heat. Later-flowering Daffodils (marked in catalogue 2, 3, and 4) should be brought into warmth later and in succession, thus sorts marked 4 should not be removed from the plunging bed until February or March. *No Daffodils will bear hard forcing or bottom heat.* After the bulbs are out of the plunging bed, give the plants as much light and air as possible, and once a week a very little weak liquid manure water until they come into bloom.

Of the stronger growing sorts use three to six bulbs, according to size of bulb, for a pot measuring 4½ to 6 inches in diameter; of the small miniature kinds, such as N. Minimus, Nanus, Minor, Cyclamineus, Triandrus, Juncifolius, and Corbularias, use twelve to eighteen bulbs for a 4½ to 6-inch pot. These small-flowered dwarf-growing species are most charming in pots or little shallow pans. The following may be had in bloom in January:—Minimus, Minor, Nanus, and Cyclamineus, and these may be mingled with Scilla sibirica and Chionodoxas, as both bloom at the same period and produce a charming contrast. For pot-culture the largest bulbs only of *Minimus*, *Cyclamineus*, *Triandrus*, and *Corbularias* should be used, as being collected when in bloom there is an uncertainty in their flowering the first season. The White Hoop Petticoat Narcissus should be potted in almost pure sand kept well moist, and if placed at once in a cold frame after potting may be had in bloom by Christmas. (*See Rock Garden Collections of Miniature Daffodils, page* 8.)

If Daffodils are wanted in quantity for cutting early in the season, plant thickly in boxes, giving same culture as recommended above for growing in pots. Of the best varieties to grow for early forcing in boxes, the following command a first place: *First early sorts*—Queen of Spain, Henry Irving, Golden Spur, Sir Watkin, Old Double Yellow Daffodil; *Second early sorts*—Emperor, Empress, Horsfieldii, P. R. Barr, Barrii conspicuus, Incomparabilis Beauty, and Stella superba.

CULTURE OF DAFFODILS IN VASES AND BOWLS
In Barr's Special Fibre Mixture.

A charming effect can be obtained by growing Daffodils in fancy vases or bowls, with or without drainage holes, by simply using our specially prepared Fertilised Fibre, Shell and Charcoal Mixture (ready for use, 3*s.* 6*d.* per bushel, 1*s.* per peek); the mixture is light, clean, and nice to handle, and *remains sweet*; indeed, it is preferable to soil where Daffodils and other bulbs are grown in fancy bowls and vases.

Three bulbs of N. Queen of Spain growing in Barr's Fertilised Fibre in a 4-inch "Doulton-ware" Vase, without drainage hole.

Culture.—Fill the vase or bowl with the Fibre, Shell and Charcoal Mixture up to within a little below the rim, and plant the bulbs in the same manner as with ordinary potting soil, just covering them; the mixture may be shaken down into place after planting and lightly watered, but should not be pressed down tightly, or the bulbs will be forced upwards when root growth commences.

After planting, either of the following plans may be adopted:—

(*a*) The bowls or vases may be plunged outdoors on a bed of cocoa fibre or ashes, and covered entirely with cocoa fibre, leaving them thus for 8 to 12 weeks, when the bulbs will have made some top growth.

(*b*) Or the bowls may be plunged in a cold frame, airy cellar, or out-house instead of outdoors; with this treatment, however, it will be necessary to occasionally give water.

(*c*) A third plan is to place the bowls after potting in a dark or moderately dark *airy* place, cool but not too cold; they must not be placed in a close cupboard or the bulbs will certainly suffer.

In the case of bowls plunged outdoors there will be no need to give any attention in the way of watering, etc., as they will, of course, have abundance of moisture from the autumn rains. Where, however, the bulbs are not exposed to the rain, the bowls should be examined once or twice a week, care being taken that the fibre mixture is kept uniformly damp; but for the first week or two after planting water should be given very sparingly, sufficient only to keep the fibre damp enough to encourage root action. As soon as the bulbs are well rooted, water should be given more freely, the fibre mixture being then kept quite moist; if the mixture is allowed at any time to become dry, even for a day, the buds will go blind; should by any chance too much water have been given, the bowls may be drained by carefully tipping them on their side. If obtainable rain water is the best to use.

When the bulbs have made some top growth the bowls should be removed to the sunny window of a sitting-room, where they will get the morning sun, or be kept in a cool greenhouse close to the glass, it being necessary that they should be given sufficient light and air to prevent the foliage from becoming drawn. Draughts and gas heat must be carefully avoided.

No bottom heat should be given, and a temperature of 55° to 60° by day and 50° to 55° by night is sufficient to obtain good blooms; the bulbs resent too warm a temperature.

☞ *For Bowls and Barr's Fertilised Fibre Mixture, see page* 38.

Barr's Prize-winning Exhibition Selections of Daffodils.

The following list of Daffodils, prepared specially for intending exhibitors, embraces a selection of the very best and most distinct varieties from the various classes. They are all of the highest quality in form and colour, and are strong, healthy growers. Any one desirous of obtaining a really choice selection cannot do better than choose from the varieties offered below. As cut blooms they are unsurpassed for beauty.

per 100, 10/6; per doz 1/6

Miniature Daffodils for the "Rock Garden."

The following are charming little subjects for rockwork, where their dainty flowers are seen to perfection. They should be left undisturbed for years, and, if happy, will soon establish themselves and afford a lovely picture in early spring. All the *Corbularias* (except *Corbularia monophylla*) and *Cyclamineus* like moisture, and should therefore be planted at the foot of the rockery. *Corbularia monophylla* flourishes in a warm dry sheltered situation, planted in almost pure sand; when coming into bloom give water freely. *Triandrus albus* (*Angel's Tears*) and *Juncifolius* delight in partial shade and a light gritty soil, and should be given a well-drained position. In the case of these Miniature Daffodils, the ground may be carpeted with close-growing surface-rooting plants, such as *Arenaria cæspitosa, Thymus serpyllum vars., T. lanuginosus, Herniaria glabra, Mossy Saxifragas,* etc.; these plants provide a natural protection for these little bulbs, besides keeping their dainty blooms from being splashed and soiled in rainy weather. We prefer, however, seeing these little gems peeping out of grass, and can supply seed of suitable fine dwarf grasses for sowing in September after planting the bulbs; this sowing will give a fine green carpet by the following spring when the Narcissi bloom.

☞ For Daffodil Seed for Autumn Sowing, *see page* 37.

Barr's New Seedling Daffodils for 1910.

The following list of Daffodils comprises some of the finest novelties, and includes new seedlings of our own raising and those of the Rev. G. H. Engleheart, the Rev. G. P. Haydon, Mr. J. C. Williams, Mr. P. D. Williams, Mrs. Backhouse, and Mr. E. M. Crosfield, one of the most successful hybridisers of recent years. We would specially draw attention to the following grand exhibition kinds: **Bedouin, Charm, Cœur de Lion, Cossack, Czarina, Dresden, Earl Grey, Eros, Fire Dome, Furnace, Isis, Jaspar, Lord Kitchener, Mermaid, Messina, Michael, Michael Angelo, Mrs. George H. Barr, Noblesse, Oakhurst, Peter Barr, Red Beacon, Red Chief, Seraphine, Sirdar, Sir Galahad, Snow King, Socrates, St. George, Tennyson, The Grey Mare, Timon, Uncle Robert,** and **White Standard**—all of great beauty. We would mention that we have purchased this season from Mr. Charles Dawson (who is giving up growing Daffodils) his "Rosemorran" Daffodil seedlings, containing many beautiful varieties. Visitors at the London and Birmingham Shows will well remember Mr. Dawson's charming exhibits.

☞ Where we have a record, we give in inches the heights as registered at our Surbiton Nurseries.

The relative qualities as we judge them are indicated by xx, xxx, xxxx, the highest quality flower being given the most marks. The figures after the names indicate the relative period of flowering, (1) being earliest, (5) being latest.

	each. £	s.	d
Adonia (Barrii), *new* 1909, *raised by Mr. E. M. Crosfield*, perianth cream, broad and elegantly formed, cup fiery orange-scarlet, prettily fluted; the colour is very lasting	2	2	0

NARCISSUS ALICE KNIGHTS.

The earliest of white Trumpet Daffodils and a beautiful flower; perianth white, trumpet creamy white, of elegant form with prettily frilled open mouth; the whole flower is of great substance and lasts well, whether cut or on the plant; of good constitution and a free bloomer, ht. 12 in. AWARD OF MERIT R.H.S., April 11th, 1905, and R.B.S., March 21st, 1906. *Raised at our Surbiton Nurseries.* *See page* 18.

Barr's General List of Daffodils

For Alphabetical Index, see page 2 of Cover.

The following list of Daffodils embraces the highest class and most distinct varieties, surpassing in beauty and diversity all other assortments offered to the public. It represents the cream of our Collection (over 500 kinds), and the best of the newest varieties in commerce up to 1910, several being offered to the public for the first time this season.

During the past few years we have rejected many of the older kinds which we considered had been superseded by better sorts at equally moderate prices. We can, however, generally supply such if required, as, although we do not catalogue them, we keep a small stock of them at our Nurseries.

Time of Flowering.—The relative period of flowering of the different varieties and species out of doors we have denoted by means of numbers after the names, thus:

(1) **1st early,** flowering from February to early March.
(2) **2nd early,** flowering in March.
(3) **Varieties flowering in mid-season,** or early in April
(4) **Late-flowering** varieties, from middle to end of April.
(5) **Very late-flowering** varieties, opening in May.

The actual period of blooming depends upon the season and district; thus in early districts (1) would commence in January and early February, while in colder districts end of February or beginning of March; but the natural rotation would remain the same.

Height.—In most cases we give also the heights in inches as recorded at our Nurseries.

Quality of Flower.—Each season we go carefully over our Daffodil collection with a view to recording the quality of each variety. This we indicate by x, xx, xxx, and xxxx, giving the most marks to those we judge to be the finest. We trust this record may be found useful to amateurs in making their selections.

Cultural Marks.—* The varieties marked thus * thrive best under the shade of deciduous trees, naturalised in grass in shady nooks, or on grassy slopes facing north.

† indicates those kinds which should be selected where Daffodils are grown in pots or for exhibition; they are, however, also splendid border varieties.

§ indicates those Daffodils which, besides being fine border plants, make a pretty effect when naturalised in grass; they are all strong growers and free bloomers.

Any Daffodil not offered in this Catalogue we can generally supply, if required.

DIVISION I.—TRUMPET DAFFODILS.

LORD ROBERTS (*much reduced*).
(*Example of a Flower in Division I.*)

DISTINGUISHING CHARACTER.—TRUMPET OR CROWN AS LONG AS OR LONGER THAN THE PERIANTH SEGMENTS.

†**Michael.** *See* **New Seedling Daffodils,** *page* 11 .....each £25

§¦**Mikado** (3), xx, *new* 1905, flower of *M. J. Berkeley* form, but much finer; colour golden-yellow, with graceful twisted perianth, and very large trumpet with wide open mouth, deeply flanged at brim; very showy and free flowering, ht. 15 in. ..... 12 6...1 3

Minimus, true (1), the smallest and dwarfest Trumpet Daffodil, flowers rich full yellow; height about 3 inches, flowering outdoors in February; a dainty little gem for edgings, nooks on rock-work, or to naturalise in grass, and for pot culture. It likes a peaty soil. In 1887, during a tour in Spain, the late Mr. Peter Barr found this charming miniature Daffodil growing freely amongst gorse, with a south aspect. *For our annual supply we have to depend upon collected bulbs which are taken up while the foliage is green: in consequence there is a possibility that all the bulbs may not bloom the first season, but a proportion will* .....per 1000, 100/-; per 100, 10/6 1 6...0 2

*†**Minor, true** (1), full yellow, divisions of perianth gracefully twisted, trumpet distinctly lobed, valuable for edgings and rockwork, *very early*, ht. 7 in. .....per 100, 40/- 5 6...0 6

M. J. Berkeley, omitted, being so shy a bloomer.

†**Monarch** (3), xxx, *raised at our Surbiton Nurseries*, a noble flower, and one of the most refined of all the Giant Golden Trumpeters; perianth and trumpet rich full yellow and very large, of perfect form and fine substance, growth strong and sturdy, ht. 20 in.... 42 0...4 0

*†**Nanus, true** (1), rich full yellow, very dwarf and early, a gem for edgings and naturalising on grassy banks, etc., ht. 6 in.; now rather scarce. *Lobularis is generally sold for it, but is quite a distinct variety and will be found offered on page* 20 ..... 5 6...0 6

†*†**Obvallaris (Tenby Daffodil)** (1), xx, this very distinct variety has all the fine qualities that delight a connoisseur, perianth and trumpet full yellow, *very early*; it is best grown in partial shade, and is a fine variety for naturalising in grass; it also forces well; ht. 12 in. .....*Strong bulbs*, per 1000, 50/-; per 100, 5/6 0 10... —

(B) WHITE TRUMPET DAFFODILS.

Varieties with White Perianth and White or nearly White Trumpet.

Most of the Daffodils in this section thrive best in fibrous virgin loam, mixed with well-decayed leaf-soil; generally speaking they dislike manure; where, however, the soil is very poor, bone-meal or basic slag may be used (for full directions, *see page* 3). *The varieties marked thus * thrive best in the shade of deciduous trees, naturalised in shady grassy nooks, or on grassy slopes facing north.*

	per doz. s. d	each s. d
†**Ailsa.** *See* **New Seedling Daffodils,** *page* 9 ..... each £7 10*s.*

***Colleen Bawn** (1), xx, silvery white, broad and gracefully twisted perianth, a pretty drooping flower, ht. 15 in.; best grown in grass and shade	8 6	...0 9
†**Eveline** (3), xxx, *new* 1907, perianth snow-white, trumpet white with prettily cut margin, ht. 10 in.	48 0	...4 6
§†**Grace Darling** (2), xx, perianth white, gracefully twisted, trumpet cream passing to white, an elegant flower, ht. 20 in.	6 6	...0 7
†**Henri Vilmorin** (3), xxx, *new* 1903, *raised by Rev. G. P. Haydon*, a most beautiful white Trumpet Daffodil of refined texture and form; trumpet long and of great substance, perianth spreading and of *Empress* shape, flower 4¼ in. across, ht. 13 in. AWARD OF MERIT R.H.S., April 19th, 1904 ..... each £4 4*s.*		
†**Indamora,** xxxx, *new* 1908, broad solid white perianth and long straight creamy white trumpet with open mouth, beautiful .....(*only a few bulbs for sale*) each £4 4*s.*		
†**Lady Audrey** (4), xxxx, *raised at our Surbiton Nurseries*, a flower of great beauty, white perianth slightly campanulate and long straight bold trumpet widening at mouth, cream-coloured passing off white. AWARD OF MERIT BIRMINGHAM, April 24th, 1902	—	...12 6
†**Lady of the Snows** (4), xxx, *new* 1905, perianth solid white, trumpet of fine form, white and elegantly frilled at mouth. AWARD OF MERIT BIRMINGHAM, April 18th, 1905 ..... each £3 3*s.*		
†**L'Innocence** (2), xx, perianth white, trumpet broad, pale primrose passing to white, ht. 20 in. ..... per 100, 50/-	7 0	...0 8
†**Lolah.** *See* **New Seedling Daffodils,** *page* 11 ..... each £3 3*s.*		
†**Loveliness** (4), xxxx, a very large flower of remarkable beauty, with bold stiff snowy white perianth, broad and smooth, and a very elegant white trumpet, expanding at mouth, ht. 14 in. Highly recommended. AWARD OF MERIT BIRMINGHAM, April 16th, 1903, and TRURO, April 3rd, 1906 ..... each £3 3*s.*		
†**Madame de Graaff** (4), xxxx, a lovely and graceful variety which must always take a prominent position among the pale-coloured trumpet Daffodils. The perianth is pure white while the trumpet opens a soft primrose shade passing off almost white. It will bear gentle forcing and makes an elegant pot plant for greenhouse decoration, while in flower beds and borders, or naturalised in grass, few Daffodils are so beautiful, ht. 16 in. It is always a favourite variety at Daffodil Exhibitions. FIRST-CLASS CERTIFICATE R.H.S. (This is on the border-line of a pale bicolor and a white trumpet Daffodil, but falls more naturally under the latter section)...*extra strong bulbs,* per 100, 60/-	8 6	...0 9
†**Mrs. H. D. Betteridge** (3), xxx, *new* 1905, a very refined and beautiful snowy white flower, perianth well formed, broad and imbricated, with a distinct fluting on surface, trumpet of model form with elegantly flanged and fluted brim, ht. 12 in.	—	...9 6
§**Mrs. Camm** (4), xx, perianth white and elegant, trumpet cream, a lovely flower of great substance, lasting well when cut, ht. 12 in. 1ST-CLASS CERT. R.H.S. per 100, 32/6	4 6	...0 5
†**Mrs. George H. Barr** (4), xxxx, a very lovely Daffodil of chaste form, perianth snowy white and slightly campanulate, elegant white trumpet well open at mouth. AWARD OF MERIT BIRMINGHAM, April 16th, 1903. AWARD OF MERIT TRURO, April 15th, 1909 ..... each £5 5*s.*

DIVISION II.—INCOMPARABILIS.

INCOMPARABILIS GLORIA MUNDI.
(*Example of a Flower in Division II.*

Large Chalice-Cupped Daffodils or Star Narcissi.

DISTINGUISHING CHARACTER.—CUP OR CROWN MEASURING FROM ONE-THIRD TO NEARLY EQUAL THE LENGTH OF THE PERIANTH SEGMENTS. (FOR VARIETIES HAVING THE CROWN EQUAL THE LENGTH OF PERIANTH SEGMENTS SEE DIVISION I.)

☞ **The varieties of Narcissus Bernardi and Nelsoni, also the larger-flowered varieties of Engleheartii, are now placed under this division.**

The beautiful **Star Narcissi** commence flowering in March, and furnish a succession of bloom throughout April. All are of elegant beauty, and as cut flowers are extensively used for furnishing vases and table bouquets. For this purpose they should be grown in quantity in boxes and forced for early bloom (*see page* 4). They make charming pot plants, while in beds and borders they are very showy and naturalised in grass they produce a graceful effect.

DIVISION III.—BARRII.

Short-Cupped Daffodils, or Star Narcissi.

(Incorporating the varieties hitherto classed as Burbidgei.)

DISTINGUISHING CHARACTER.—CUP OR CROWN MEASURING LESS THAN ONE-THIRD THE LENGTH OF THE PERIANTH SEGMENTS (NOT INCLUDING POETICUS, WHICH FORMS A CLASS BY ITSELF).

For a long time trouble was being experienced in the placing of certain new seedlings under the **Barrii** and **Burbidgei** sections, as the two divisions ran so much into one another. The revising committee therefore decided to make only one section of them, retaining the name **Barrii.**

BARRII SIDDINGTON.
(*Example of a Flower in Division III.*)

The chaste beauty of these shorter-cupped Narcissi is the more highly appreciated when the cut flowers are seen arranged in vases. The brilliancy of colouring in the cups of some, and the dainty elegance of others, render them all more or less valuable exhibition flowers. The cheaper kinds we can strongly recommend for beds and borders, and for naturalising in grass, woodlands, wild gardens, etc.

DIVISION IV.—LEEDSII.

The Eucharis-flowered or Silver-White Fragrant Star Narcissi.

Comprising all the Star Narcissi (large chalice-cupped and short-cupped) which have pure white or silvery white perianth segments and cup or crown white, cream or pale citron.

In the working out of the new classification, the revising committee felt that it would be unwise to break up this section and distribute it among the Incomparabilis and Barrii forms, seeing how distinct a "colour" section it was, and how well known to all Daffodil growers.

These chaste and beautiful Daffodils are highly prized for indoor decoration, while to cut for bouquets their fragrant flowers are greatly in demand. Plant 3 or 5 bulbs in a 5-inch pot. In flower beds and borders they are most charming, while naturalised in grass they produce a lovely effect.

DIVISION V.—TRIANDRUS AND TRIANDRUS HYBRIDS.

Triandrus and all hybrids obviously containing Triandrus blood such as Queen of Spain (a wild Triandrus Hybrid), **Agnes Harvey, Bennett-Pöe, Earl Grey,** etc.

The introduction of Triandrus blood in hybridising has resulted in such a very distinct group of hybrids that the Classification Committee of the R.H.S. deemed it advisable to make one section of them. For grace and beauty they are unsurpassed. We recommend them being given a situation partly shaded by trees, and if a little very fine dwarf grass seed is sown amongst them, the beauty of their flowers is enhanced. Once planted they may remain undisturbed for years.

TRIANDRUS (*syn.* **GANYMEDES**), **The Cyclamen-flowered Daffodils with reflexing perianth.**

THE DAINTY LITTLE "ANGEL'S TEARS" DAFFODIL (*Triandrus albus*) was found by the late Mr. Peter Barr on the mountains of Portugal and Spain, growing in very hard, firm, fine gritty soil, sometimes in the narrowest fissures of granite and slatestone rocks. All in this section make lovely little pot plants, and grown thus should be given cold frame culture. Established on rockwork they form a picture full of grace and beauty. *They prefer shade, a gritty soil, and a well-drained position.*

	per doz. s.	per doz. d.	each s.	each d.
†**Triandrus albus** (3), an exquisitely beautiful little flower, appropriately called the "**Angel's Tears**" Daffodil, having a creamy white little globular cup and perianth of same colour very much reflexing, ht. 7 in. *As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, a proportion may possibly not bloom the first season. The bulbs should therefore be left undisturbed to establish themselves* ..... per 1000, 60/- ; per 100, 6/6	1	0	...	—
,, *Larger-size bulbs* ,, 8/6	1	3	...0	2
,, *A few extra strong bulbs, recommended where the bulbs are grown in pots* ,, 15/-	2	3	...0	3
†**Triandrus calathinus** (3). One of the most beautiful little Daffodils in existence. The flowers, which are snowy white, are more than twice the size of *Triandrus albus,* with long goblet-shaped crown prettily fluted, and are borne two to three on a stem ; the foliage has a curious twisted habit, ht. 7 in. For pot culture and rockwork it is a perfect gem. The late Mr. Peter Barr collected this rare Daffodil some years ago on one of the Glénan Isles, the collecting being attended with a good deal of risk. Unfortunately it is no longer to be found there, the sea having washed away all trace of it, and this beautiful little Daffodil is becoming scarcer each year	30	0	...2	9

NARCISSUS QUEEN OF SPAIN
(About two-thirds natural size).

per doz. each
s. d. s. d.

§†**Queen of Spain** (2). XXX, *found by the late Mr. Peter Barr in Spain.* One of the most beautiful, distinct, and graceful Daffodils in cultivation, and unsurpassed either for bedding, pot or vase culture, or for naturalising in woodlands, etc. The flowers vary slightly in size, but all are of a uniform soft, delicate, clear yellow, with a gracefully reflexing perianth, trumpet of distinct and elegant form, ht. 12 in. Naturalised in grass under trees, this Daffodil forms a delightful feature in the garden. It also adapts itself readily to bowl culture in Fertilised Fibre Shell and Charcoal mixture, or damp pebbles and gravel, and grown thus affords an artistic decoration for the sitting-room. Awarded FLORAL CERTIFICATE at the Daffodil Conference, 1896. *As we have to depend upon collected bulbs for our annual supply, and these have to be taken up while the foliage is still green, there is a possibility that all the bulbs may not bloom the first season, but a fair proportion will .....1st size bulbs,* per 100, 17/6 2 6...0 3

DIVISION VI.—CYCLAMINEUS AND CYCLAMINEUS HYBRIDS.

As **Cyclamineus** blood, like that of **Triandrus,** imparts such a distinct form to Daffodils, a separate division has been made for its hybrids. It has been used by many hybridisers as a parent, but as a rule the progeny has not been long-lived. It is possible, however, that we may yet obtain hybrids with a stronger constitution to come under this division.

N. CYCLAMINEUS
(Half natural size).

CYCLAMINEUS (1), **the Yellow Cyclamen-flowered Daffodil.**

per doz. each.
s. d. s. d

This beautiful little Daffodil was re-introduced into cultivation in 1887 by A. W. Tait, Esq., of Oporto, after being lost sight of for 200 to 300 years. It is the earliest of all Daffodils and is a charming elegant little flower of very distinct form; the trumpet is rich yellow, straight and tube-like, elegantly serrated at mouth, while the perianth is reflexed as in a Cyclamen. A valuable little species for pot-culture, edgings, rockwork, and to naturalise in grass and shady nooks, or at the water's edge; it delights in a dampish sandy peat soil, ht. 6 in., FIRST-CLASS CERTIFICATE R.H.S. *As we have to depend for our annual supply upon collected bulbs, and these have to be taken up while the foliage is still green, they are not all likely to bloom the first season.* This bulb is very scarce this year, as we could only get a few collected.

POETAZ—New hybrids of Poeticus Ornatus × Best Forms of Polyanthus Narcissi.

A fine new race of Daffodils, resulting from a cross between *Poëticus ornatus* and the finest varieties of *Polyanthus* or *Bunch-flowered Narcissi*, the Poëticus being the seed-bearing parent. The plants are tall and vigorous growers, bearing heads of large well-formed flowers, deliciously fragrant; they are much finer than the common Polyanthus Narcissi, and have the advantage of being much hardier. In pots or the flower border they are very decorative, while the flowers are highly prized for cutting.

		per doz. s. d	each s. d

☞ **For Dutch varieties of Polyanthus Narcissi (Tazetta) see our General Bulb Catalogue.**

DIVISION IX.—POETICUS—True Poet's Narcissi.

These "Poet's" Daffodils or Narcissi all have snowy white perianth segments or petals, and a flattened eye or crown, yellow or lemon edged more or less deeply with scarlet or crimson, and sometimes almost all scarlet. All are more or less sweetly scented.

The earlier flowering varieties afford a very beautiful decoration indoors when grown in pots (5 bulbs in a pot) or forced, while as border plants and for naturalising in grass they are all of the greatest value.

Referring to the great beauty of these Poet's Daffodils when naturalised, Mr. William Robinson writes: "Four years ago I cleared a little valley of various fences. Through this runs a streamlet, and we grouped the Poet's Narcissi near it, also in a little orchard that lay near, and through a grove of oaks. This year the whole landscape was a picture such as one might see in an Alpine valley."

☞ **Early planting and liberal culture is specially recommended for these Poet's Daffodils. To obtain tall stems and fine large flowers they should be grown in a rich deep soil not too dry. The varieties having very highly coloured crowns should be cut young to preserve the fine colouring.**

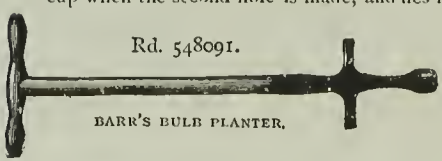
Bulbocodium—citrinum, conspicuum, miniature early yellow, and **large early yellow; Cyclamineus; Lobularis; Minimus; Minor; Moschatus of Haworth; Nanus; Triandrus albus,** calathinus, and **juncifolius**.....each variety **1s.** per packet.

USEFUL TOOLS FOR BULB PLANTING, Etc.

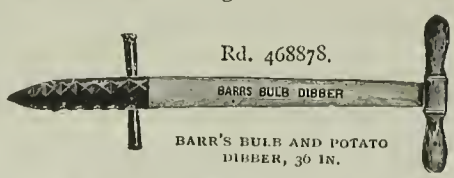
Barr's Special Bulb Planter (Regd. 548091), specially designed for planting Daffodils and other bulbs in grass. This tool cuts and lifts a clean circular piece of turf which is released from the cup when the second hole is made, and lies ready at hand to fill in the holes when the bulbs have been put in, it being only necessary to remove a little of the soil from the bottom of the sod. A time must be chosen for planting when the ground has become softened after early autumn rains and not when in a hard and baked condition, as it is then impossible to use this or indeed any other tool with success. By the use of BARR's SPECIAL BULB PLANTER a large quantity of bulbs may be planted in a very short time, and without the least disturbance of the sward. The length of the tool is 38 inches over all, weight about 3½ lbs. The cup is manufactured from high-class hardened steel and always carries a keen cutting edge.

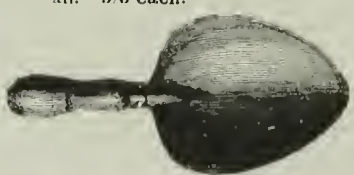


Supplied in 3 sizes of cup :—To cut out a circular hole 2 inches diameter.
,, ,, ,, 2¼ ,, ,,
,, ,, ,, 2½ ,, ,,
10/6 each.

We shall send the medium size (2¼ in.) if no instructions to the contrary are given.

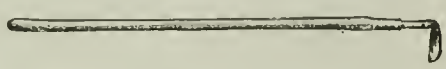
Barr's Special Bulb Dibber (Regd. 468878), specially designed for dibbling bulbs into borders, etc.; steel shod, with strong iron tread and cross wooden handle; a good strong heavy tool, weight about 6¾ lbs., length 36 inches over all. **9/6 each.**



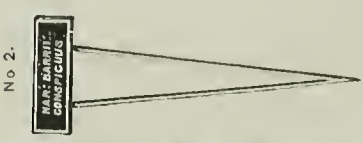


Barr's Special Bulb Trowel, *made of best steel,* specially designed for lifting and planting bulbs, etc. It will be found of great value for general garden purposes, and far in advance of the old-fashioned trowel. **2/9 each.**

New Pattern Daffodil Hoe, a very useful tool for breaking the surface soil in the Flower Border during dry weather, and especially in early spring when Daffodils are just showing; also a useful weeding tool. With 3 ft. handle (41 inches over all, and weight under 1 lb.) **1/9** each, with short handle (12½ inches), **1/3** each.



BARR'S SPECIAL METAL LABELS FOR DAFFODILS, Etc. (With Raised Letters.)



No. 1, with solid metal shank, about 9 inches long. We specially recommend this for beds and borders. 4*d.* each.

No. 2, with stout wire stem, 6 or 9 inches long: specially suitable for pots, etc. (*in ordering please state whether a short or long shank is required*). 3*d.* each.

Ditto, with 12-inch stem, 4*d.* each.

No. 3, for Suspending, 3*d.* each.

☞ The above prices include the stamping of any name required.

These special metal labels are not kept in stock, being made only to order. The time taken to execute an order is generally from 2 to 3 weeks.

For Wooden Labels and other Garden Requisites, see BARR'S SEED GUIDE. Free on application.

Manures, Soils, Fibre, Vases & Bowls for Daffodils.

Barr's Phytobroma, the best Manure for Daffodils, Hyacinths, Tulips, etc., and for Flower Borders generally. It should be mixed with the soil *below* the bulbs at planting time at the rate of 2 to 3 ozs. to the square yard, and in spring, when the bulbs are showing above ground, a top-dressing may be given of 3 oz. to the square yard. **For Pots,** mix *Phytobroma* with the soil, to be used at the rate of 1 lb. to the bushel, and in Spring, when growth is showing, top-dress once a fortnight, using a small teaspoonful and well mixing with surface soil. 2-lb. tin, 1/-; 7 lb. 2/6; 14 lb. 4/6; 28 lb. 7/6; 56 lb. 12/6; 1 cwt. 20/-.

Basic Slag, per cwt. 6/6; per 14 lb. 1/-.

Bone Meal (*Genuine Fine Crushed Bones*), best quality, per cwt. 12/6; per 7 lbs. 1/-.

Sulphate of Potash, per cwt. 21/-; per 7 lbs. 1/9.

Barr's Specially Mixed Potting Soil, containing a suitable quantity of Phytobroma, 2/6 per bushel (*bags free*).

Barr's Fertilised Fibre, Shell, and Charcoal Mixture, ready mixed for use, a specially prepared mixture suitable for growing bulbs in vases, bowls, jardinets, etc. (*see page* 4). 3/6 per bushel; 1/- per peck (*bags free*).

Small Pebbles and Charcoal, 6*d.* per quart; 3/6 per peck.

Charcoal (*fine twig*), per peck 1/-; per bushel 3/6.

Cocoa Fibre for plunging pots and covering beds in winter, per bushel, 1/3; 3 bushels for 3/6 (*bags free and full measure guaranteed*).

Special Fancy Vases and Bowls for growing Daffodils, etc., in.

We have had special little fancy vases made for us by Messrs. Doulton for growing Daffodils and other spring bulbs in our Fertilised Fibre and Charcoal Mixture. The vases are of elegant shape, of neutral art green and drab shades, and without drainage holes, thus saving the use of saucers. They will be found most useful for growing not only Daffodils in, but also Tulips, Hyacinths, Crocuses, early Scillas, Snowdrops, Chionodoxas, and Lily of the Valley, also the charming winter-flowering Irises—reticulata, etc., either for table decoration or the greenhouse. During summer these bowls are very useful for holding cut flowers, etc. All Daffodils which may be grown in pots may also be grown in these fancy bowls, and in the foregoing pages we have indicated thus † those kinds most suitable for the purpose.

Barr's "Doulton-Ware" Bulb Vases, unglazed, neutral drab shade, 2½ in. dia., -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia., 3/- each.
" " " " " **glazed dark green,** 2½ in. dia., -/9; 4 in. dia., 1/3; 5½ in. dia., 2/-; 7 in. dia., 3/- each.

Fancy Decorated Japanese Bowls:—5 in. dia., -/10; 6 in. dia., 1/3; 7 in. dia., 1/9; 8¼ in. dia., 3/-; 9½ in. dia., 4/-; 10¾ in. dia., 6/-; 12 in. dia., 8/6 each.

Daffodil Coloured and Uncoloured Plates.

These Daffodil Plates can be had, post free, at the following charges:—

(1) Two large Uncoloured Illustrations, one representing a group of Yellow Trumpet Daffodils, and the other a group of White Trumpet Daffodils, *drawn and arranged for the "Gardener's Chronicle" by Agnes Barr.* The two Plates for 1*s.*

(11) Coloured Plate of Daffodils *Peach, Maggie May, Gloria Mundi* and *Poeticus Cassandra.* 3*d.*

A Complete Set of the above Plates sent, post paid, for 4*s.*

☞ Good Water-colour Paintings of any Daffodils can be supplied (to order) during the Daffodil flowering season at the rate of 10s. 6d. per bloom; Wash Drawings in black and white, 7s. 6d. per bloom. *Orders should be given early.*

Daffodil Notices.

Naming Daffodils.—Cut specimens of Daffodils we undertake to name correctly, at the charge of 4*d.* each, 3*s.* per dozen, to cover attendant expenses. Address all cut specimens to be named, accompanied by a remittance, to our Nurseries, Surbiton, Surrey.

Daffodil Prizes.—We award Silver Cups, Vases and other prizes for Daffodil Competitions in various parts of the British Isles and Colonies. Particulars of **Competitions for Spring 1911,** for Barr's Silver Daffodil Vases, will be sent on application.

Hazell, Watson & Viney, Ld., London and Aylesbury.

Special Notices and Terms of Business.

FREE CARRIAGE OF BULBS.

All Orders for Bulbs to value £1 and upwards sent **Carriage Paid** to any Railway Station in the United Kingdom.

Prepaid Orders for Bulbs to value 10*s.* and upwards sent **Carriage Paid** to any Railway Station in the United Kingdom.

5% Cash Discount on Bulb Orders of 20s. and upwards.—1s. in the £ discount is allowed for Cash with Order (*with the exception of the special Collections offered on pages 5 to 7, which are strictly nett*), and this may be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the Order. The same discount may also be deducted from all Bulb Accounts of 20*s.* and upwards when paid within 14 days from date of invoice (*excepting Collections offered on pages 5 to 7, which are nett*).

Terms of Credit.—Our books are made up half-yearly, when all accounts are due nett.

Remittances.—Money Orders and Postal Orders should be made payable at Bedford Street Post Office; these and all Cheques should be crossed "London and County Bank." Small amounts may be remitted in Postage Stamps, or Coin in a Registered Letter.

Packages.—Boxes, Bags, etc., are charged at cost price, but these may be deducted from our account if returned Carriage Paid within a fortnight. *Returned empties should have the sender's name on the address label for identification, and an advice sent by post, stating date of despatch and name of Railway Co.*

Catalogues.—Our **Seed Guide** is published in January, **Descriptive Catalogue of Bulbs and Tubers for Winter and Spring Planting** in January, **Hardy Plant Catalogue** 1st of March, **Daffodil** and **General Bulb Catalogues** in August. We are always pleased to forward any of these Catalogues, free of charge, to friends of our Customers on receipt of a line requesting us to do so.

Our Surbiton Nurseries.—Visitors are invited during Spring to see our magnificent Collections of Daffodils and Tulips in bloom. The Nurseries are situated less than a mile from **Surbiton Station** on the London and South-Western Railway. Cabs are always to be had at Surbiton Station.

Gardeners.—We keep a special Register of Gardeners in want of situations, and shall be pleased to put such in communication with any of our Customers requiring Head Gardeners.

Notices to our Foreign and Colonial Correspondents.

Prepayment necessary.—Owing to the difficulty of collecting accounts abroad, we beg that Customers will kindly enclose with their Orders *a remittance, a draft, or an* "order to pay" on a London Bank, or Agent; the remittance should be sufficient to cover cost of carriage when the freight is required to be paid in advance.

Cash Discount 5%.—In the case of Prepaid Orders to value 20*s.* and upwards we allow a discount of 1*s.* in the £ from the amount of Bulbs or Seeds ordered, which may either be deducted by the Customer when remitting, or if this is not done, a liberal equivalent in goods will be added to the order.

Carriage.—No allowance for Carriage can be made in the case of Foreign Orders; the extra attention necessary precludes any kind of allowance in this respect.

Packing.—A moderate charge will be made where special materials have to be used, such as Sphagnum Moss, Oil-silk, etc., and where any special packing necessitates a great deal of labour (as in the case of some Plant Orders), when out-of-pocket expenses only will be charged.

Parcel Post Rates.—
